1 Project Snapshot

A hypothetical university project — Digital Marketing, Thompson Rivers University, Winter 2024.

Scope note: Pure Harvest Connect is a concept business created for coursework. No budget was spent, no campaigns ran, and all targets in this portfolio are planning scenarios, not results.

The idea

Pure Harvest Connect is an online marketplace that connects Kamloops shoppers directly with nearby farms. Shoppers get fresh, seasonal produce and can see who grew it; small farms get a direct sales channel without a middleman.

The problem

Local food is hard to buy conveniently. Busy shoppers lack time for farmers' markets, and small farms lack the visibility and tools to sell online. Existing platforms are either directories with no checkout or are not available locally.

What I did

- Defined the business concept, primary goal (direct online sales), and three buyer personas.
- Analysed three competitors and turned their gaps into product features.
- Designed the logo, site map, wireframes, and visual direction, then built a working Wix storefront.
- Wrote an integrated marketing plan: content, social, SEO, Google Ads, and influencer outreach.
- Set a hypothetical budget and a consistent set of KPIs to judge the plan.

Skills shown

Audience research · Competitive analysis · UX wireframing · Wix e-commerce build · Content strategy · SEO & keyword research · Paid search planning · Social & influencer strategy · KPI design

Project poster

KAMLOOPS, BC · FARM TO TABLE, ONLINE

Pure Harvest Connect

Fresh, seasonal food straight from local farms, with the story of who grew it.

WHO IT'S FOR

Emma
Busy, wants fresh local food

Carlos
Gardener who needs more variety

Maya
Small farmer who wants to sell online

HOW IT REACHES THEM

01
Discover
Local search, Google Ads, Instagram, local creators

02
Explore
Farmer stories, seasonal guides, weekly blog

03
Buy
Simple online shop with matching landing pages

04
Return
Fortnightly email with recipes and new arrivals

SIX-MONTH LAUNCH GOALS

+30%
website visitors

+20%
email subscribers in one quarter

\$10K
social media budget

Hypothetical student project for a university Digital Marketing course. No budget was spent and no campaigns ran.

Digital Marketing

One-page summary of the Pure Harvest Connect plan.

2 Audience & Market

Who the marketplace serves, and where competitors leave room.

Buyer personas

Emma, 32 — Conscious Consumer

Carlos, 45 — Urban Gardener

Maya, 50 — Small-Scale Farmer

Persona	Situation	Needs	How Pure Harvest Connect responds
Emma	Remote professional in Kamloops; health- and eco-conscious; short on time.	Fresh local food, convenient ordering, knowing where food comes from.	Online ordering, farmer profiles with growing practices, sustainability focus.
Carlos	Backyard gardener who can't grow everything he needs.	Variety to supplement his garden; growing tips; easy delivery.	Broad seasonal range, community forum for tips, convenient delivery.
Maya	Runs a small family farm outside Kamloops.	Visibility, a values-aligned platform, simple order management.	Customisable farm profile, direct customer relationships, order tools.

Competitor analysis

Competitor	Strength	Gap	Pure Harvest Connect response
Farmigo	Community-supported agriculture focus; strong farm profiles and events.	Limited profile customisation; reported delivery issues.	Richer, customisable farmer profiles and live Q&A events.
LocalHarvest	Large farm directory with strong search.	Dated interface; a directory rather than a store.	Modern design with full checkout, not just listings.
FarmDrop	Clean design; flexible produce boxes.	Limited regional availability; higher prices.	Built specifically for Kamloops and nearby farms.

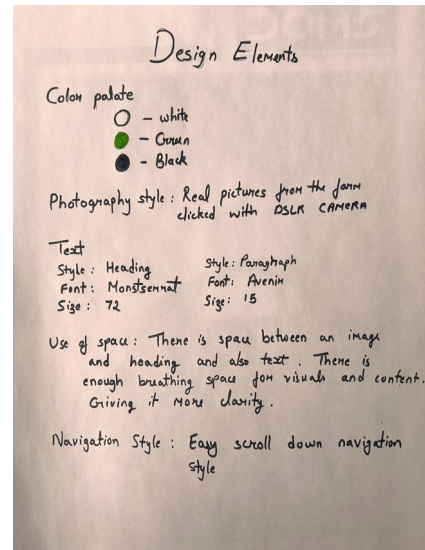

3 Brand & Website

From brand concept and wireframes to desktop, mobile, and a working storefront.

Brand identity

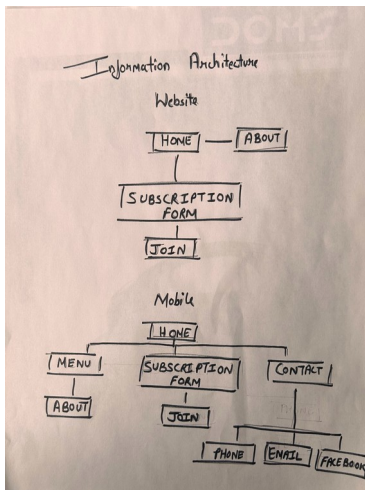

Logo

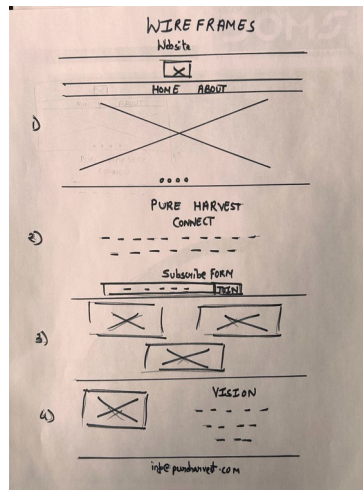

Design elements — colour, type, navigation

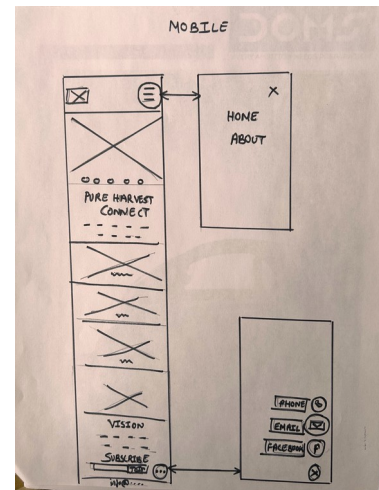

Planning the site

Information architecture

Desktop wireframes

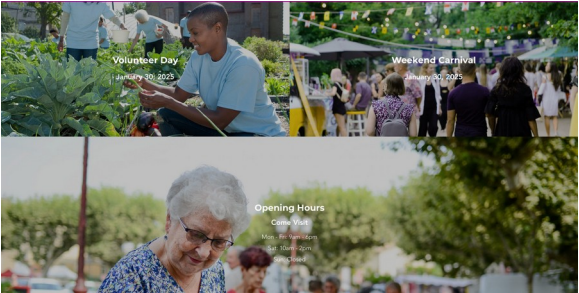

Mobile wireframes

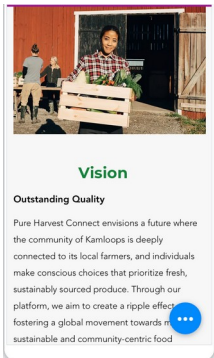

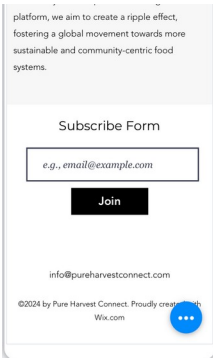

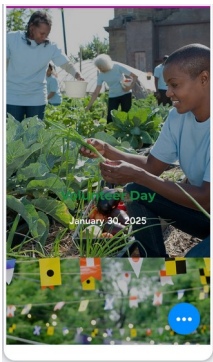

Desktop and mobile design

Home page

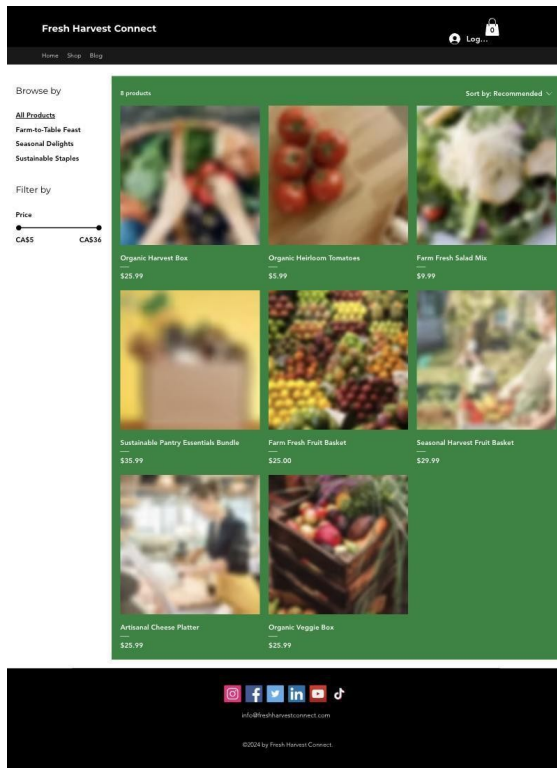

Vision and sign-up

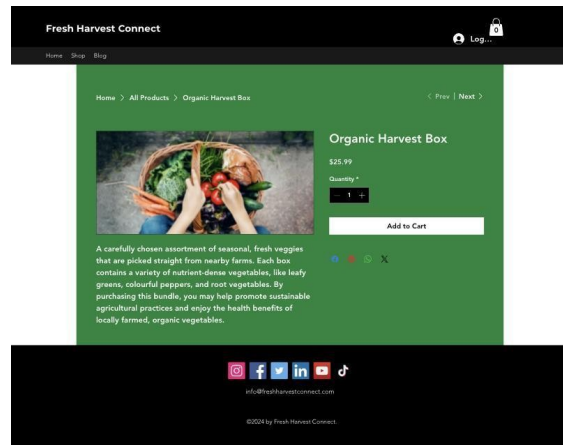

Mobile site screens.

Working storefront (Wix)

The wireframes were built into a published Wix store with a shop, product pages, cart, and blog. The prototype was published under an earlier working name; the structure and content are the same.

Shop page — 8 products

Product detail page

Site content against the 7Cs of e-commerce design

Element	How the site addresses it
Context	Clean, image-led layout built around the local-farm mission.
Content	Original About page, product descriptions, and blog posts on sustainability and seasonal food.
Community	Local events plus social channels to extend the community online.
Customization	Copy written for the Kamloops audience; personal farmer stories.
Communication	Weekly blog articles and a newsletter.
Connection	Newsletter sign-up, social links, and email contact.
Commerce	Shop, product pages, and cart for direct farm-to-consumer purchase.

4 Marketing Strategy

One customer journey, with each channel assigned a clear job.

Customer journey

Stage	Channels and content	Desired action
Discover	Local search, Google Ads, Instagram and Facebook posts, influencer content.	Visit a relevant page.
Evaluate	Seasonal guides, farmer stories, product pages, blog.	Browse products or join the newsletter.
Purchase	Ad landing pages, product details, cart.	Place an order.
Return	Fortnightly email, recipes, seasonal arrivals, community events.	Buy again.

Content plan

Channel	Cadence	Content	Supports
Blog	Weekly, Wednesdays	Seasonal produce, farmer stories, sustainable farming, local events.	Organic traffic
Email	Every two weeks	New blog posts, seasonal arrivals, subscriber-only guides.	Repeat purchases
Lead magnet	Ongoing	Downloadable guides: seasonal cooking, beginner gardening, reducing food waste.	Email sign-ups
Social	Regular, plus seasonal campaigns	Short videos, farm behind-the-scenes, recipes, infographics; special-day campaigns such as Thanksgiving.	Engagement

Social platforms

Platform	Role
Instagram	Main visual channel: produce, farm stories, Reels, and influencer partnerships.
Facebook	Local community reach: groups, events, and paid ads to Kamloops households.
TikTok	Short-form storytelling through local creators, reaching younger shoppers.
LinkedIn	Farmer recruitment and partnerships with local businesses and organisations.

SEO: keywords by search intent

Intent	Example keywords	Used for
Transactional	local organic produce delivery Kamloops; buy local produce; fresh local vegetables Kamloops	Shop and product pages, ads
Informational	sustainable farming practices in Kamloops; benefits of buying local	Blog posts and guides

Local	local farmers market Kamloops; farm-to-table Kamloops; CSA Kamloops	Location pages, Google Business Profile
Navigational	Pure Harvest Connect; Pure Harvest Connect login	Brand search

Off-page: guest posts on local food and sustainability blogs to earn backlinks, plus local citations and directory listings.

Google Ads structure

Campaign	Ad group	Sample keywords	Headline
Local Produce	Farmers Market	local farmers market Kamloops; farm pickup Kamloops	Discover Freshness at Kamloops Farmers Market
	Organic Farming	organic produce Kamloops; eco-friendly farming Kamloops	Taste the Difference with Organic Produce in Kamloops
	Community Support	community-supported agriculture Kamloops; support local farmers Kamloops	Join the Movement: Support Local Agriculture in Kamloops
Direct Farm Sales	Farm-to-Table	farm-to-table Kamloops; direct farm sales Kamloops	Farm-Fresh Delights Await in Kamloops
	Ethical Farming	ethical farming Kamloops; sustainable food Kamloops	Sustainable Food Choices in Kamloops
	Freshness & Quality	farm-fresh eggs Kamloops; artisanal food Kamloops	Elevate Your Meals with Fresh, Quality Ingredients

Each ad group points to its own landing page that matches the ad's message. Each keyword sits in one ad group only, so ads don't compete with each other. Optimisation levers: match types, negative keywords, ad extensions, A/B-tested copy, and bid adjustments by device, location, and time of day.

Influencer outreach

- **Who:** Kamloops creators focused on sustainable living, healthy eating, and supporting local business.
- **Mix:** micro-influencers for trust and engagement; one or two larger accounts for reach.
- **Finding them:** local hashtags such as #KamloopsFarmers, #SupportLocal, and #SustainableLiving.
- **Selection criteria:** brand fit, engagement rate, authenticity, local presence, professionalism.

5 Budget & Measurement

A hypothetical six-month launch scenario with consistent targets.

Scenario assumptions: the figures below are illustrative planning numbers for a six-month launch. Month 1 is treated as the baseline. No money was spent and no data was collected.

Social media budget — \$10,000 over six months

Category	Allocation	Notes
Paid social advertising	\$7,500	Instagram and Facebook ads, including boosted posts (about \$1,250/month).
Content creation	\$1,500	Photography, short video, and graphics.
Management tools	\$500	Scheduling and analytics.
Testing	\$500	A/B tests of creative, audiences, and messaging.
Total	\$10,000	

Google Ads and influencer fees are outside this social budget and would be costed separately.

KPIs and targets

Measure	Assumed baseline (month 1)	Target	Why it matters
Orders	~22 per month	~29 per month by month 6	The primary goal: direct online sales.
Conversion rate	1.5% of visitors	Hold at 1.5% or better	Shows whether traffic is turning into sales.
Website visitors	1,500 per month	1,950 per month (+30%) by month 6	Overall reach; split by source in Google Analytics.
Email subscribers	200	240 (+20%) in one quarter	Builds repeat purchases.
Social engagement rate	3.0%	3.45% (+15% relative) in 3 months	Content quality, measured as interactions ÷ reach.
Instagram followers	Launch	+200 in month 1; +500 by month 3	Audience growth on the main social channel.
Cost per new customer	Set in month 1	Lower each month	Shows whether ad spend is efficient.

Using the numbers to make decisions

Budget only moves after the drop-off point has been found:

- **Low traffic:** a targeting or message problem; review keywords, ads, and audiences.
- **Visitors but no add-to-cart:** a product page problem; improve photos, descriptions, and pricing clarity.
- **Carts abandoned:** a checkout problem; simplify the purchase flow and delivery options.
